

Bluebonnet Farms

Corn Gluten Blend Granules

Natural High Nitrogen Fertilizer & Organic Soil Builder
The Best Choice for Lawn, Trees and Shrubs
When Only Organic Nitrogen Is Needed

-Features-

- ✓ Contains 10% organic nitrogen with the necessary level of organic yeast culture needed to quickly break down thatch to humus and activate the soil bacteria.
- ✓ You can expect very green turf growth with increased density that naturally chokes out weeds. The turf grows a little more slowly which reduces mowing by about one fourth when compared to regular commercial fertilizer.
- ✓ Ideal for organic lawns, pasture, golf courses, playgrounds and parks. Also very beneficial for trees and ornamental plants.
- ✓ A highly effective, environmentally friendly, soil enriching, clean product producing results that astonishes everyone.
- ✓ Very safe to use will not burn your lawn or plants. Children and pets can walk on the area immediately after application without concern. Birds, pets and wild animals can eat it without harm.
- ✓ The longer you use this product the more organic matter your soil will contain increasing its ability to hold moisture thus saving precious water and money. Your turf, trees and shrubs will be more resistant to heat and cold stress and maintain their natural green color longer.
- ✓ Nutrient runoff is reduced to near zero since the granules stay put which keeps nitrogen and phosphate out of streams, ponds and lakes.
- ✓ This environmentally friendly product releases its nutrients slowly through the natural breakdown and decay of ingredients over several weeks and months,
- ✓ Apply 20lbs per 1,000 square foot evenly with a broadcast spreader or by hand around trees, flowers or ornamental shrubs.
