Manufactured/Guaranteed By:
AC Nutrition, LP
PO Box 2006
Ardmore, OK 73402
Net Weight 50 lbs. (22.6 Kg)

Feeding Directions

When starting weaned calves on feed for the first time, offer them plenty of roughage in the form of hay or pasture and hand feed for the first week to help calves adjust to grain rations. Once they have become adjusted to feed, they may be fed from 1% to 3% of their body weight a day in feed, depending on the desired growth rate and condition of each animal. If calves start becoming too fat, simply reduce the amount of feed, and they should level off where you want them. Offer to cattle free choice for maximum finishing. Feed 1 to 2 lbs. per 100 lbs of body weight daily to adult cattle on pasture as a maintenance ration. For added gain and bloom, add 1 lb. to 2 lbs. of Bluebonnet Boost-Em supplement daily. Hay or forage may be fed as desired. Clean out feeders regularly and offer clean fresh water at all times. Keep feed in fresh in cool, dry storage. DO NOT use feed that is old, molded or insect contaminated.

CAUTION: This product contains added copper. Do Not Feed To Sheep.
